

Amadeus

e-Travel Management Solutions

Sales & e-Commerce

Amadeus e-Travel Management Solutions remove the complexities from making travel arrangements allowing your employees to concentrate on what matters most - your business. When your employees use Amadeus e-Travel Management, they can easily plan, book and purchase complete travel itineraries within your company's guidelines. It enables corporations and travel agencies alike to integrate all the elements of their global travel programs, including travel policies, preferred suppliers and negotiated rates, into one easy-to-use website.

Amadeus e-Travel Management, customizable solutions that bring significant time and cost-efficiencies that go directly to the bottom line.

Traveler friendly

Using Amadeus e-Travel Management's fresh, user-friendly interface, employees simply open a Web browser, log-in, and make travel plans from anywhere, any time. By automating reservations for air, car, hotel and rail in one website, employees spend less time calling travel agents and more time focusing on their jobs.

Travel manager-minded, travel agency-supported

Whether your travel program involves one department, twenty worldwide offices, or anything in between, Amadeus e-Travel Management lets you manage the travel process in one, easy-to-use Web site.

Communities enable you to use one central travel site to quickly assign specific policies to groups of employees, departments, or worldwide business units.

Similarly, travel agencies leverage communities to apply different policies to different corporate clients.

Rules wizards make applying policies quick and easy.

Because the platform adapts to your local requirements - such as distribution systems, rail suppliers, language and currency - introducing the solution to a new office location is as easy as creating a new community within your central site. No time. No hassle. No extra cost.

First in online booking, **Dry Run Administration** lets you easily make and test changes — like adding a new airline

contract — in real time. This eliminates the need for “site reloads” and lets you post policy changes and updates for any number of user groups.

What type of reporting capabilities are available with Amadeus e-Travel Management?

Amadeus e-Travel Management's reporting module lets you create customized reports from any number of data sources on your Amadeus e-Travel Management site.

Amadeus' powerful reporting engine can track both online and offline activity, and consolidate data from distribution systems and travel agencies. This means you can accurately — and quickly — track policy compliance and improve your negotiating position with suppliers.

e-Reporter will provide you with information on:

- > Traveling booked online through Amadeus e-Travel Management and offline through a travel management company
- > Activity across multiple travel management companies and content providers, including multiple distribution systems
- > Policy compliance
- > Employee location
- > Travel volume by supplier
- > Specific groups of travelers, individual travelers, individual trips and much more

Amadeus e-Travel Management brings your travelers the content choices they need

Amadeus e-Travel Management connects to all major distribution systems, hotels outside the distribution systems, major low cost carriers and rail providers, not to mention Amadeus' own comprehensive network of airlines, hotel properties and car rental companies. Furthermore, Amadeus e-Travel Management incorporates useful travel content, such as information on weather, public transportation maps and up-to-date visa and customs information. With its user-friendly interface Amadeus e-Travel Management provides the content that is relevant to your organisation and allows your travelers to be in control of their own travel arrangements.

Worldwide Experience

As Amadeus customers, Amadeus e-Travel Management users have peace of mind. They know that they are working with a trusted and proven travel technology partner. Amadeus' adoption, training and implementation programs, 24/7 global customer service and easy to use corporate solutions deliver the industry's highest adoption rates. It all adds up to cost efficiencies that go straight to your bottom line.

“Amadeus e-Travel Management is both effective and exceptionally intuitive. It allows us to specify policies and content for any group we choose, be it a large number of corporations accessing our standard offer or a concrete department in an individual corporation. It also allows us to adapt to new situations quickly. We are autonomous and can make, test and apply changes in real-time. When a corporation's policy changes, this kind of reactivity is key”
